

Complete Vision

Complete Millwork is a moulding & millwork showroom in Hudson, WI, featuring hardwood-wrapped components and products.

Solve a real problem in the local market place. That was the original goal of Complete Millwork. Helping solve a real problem globally was a bonus. In researching new business opportunities, Complete Millwork quickly saw the advantages in today's veneer wrapping technologies: long, defect-free lengths; fast, easy installation; extremely versatile; and very resource efficient. To share their vision, they built a showroom dedicated to these hardwood-wrapped marvels.

Contact Industries was called upon to supply Complete Millwork with the hardwood-wrapped moulding, millwork, door components and stair parts they needed to fulfill their vision. Contact's products were selected for their versatility and overall product quality. Slowly but surely, builders and remodelers, as well as retailers and wholesalers, are starting to see the same thing.

Contact Industries' Natural Wood-Wrapped Products

Contact Industries offers a wide range of profile-wrapped products, including mouldings, window and door components, and custom building components. Many of these products are custom-designed to meet the specific requirements or requests of that customer. Standard specifications for these products are:

Substrate: *Virtually any material, including finger-jointed pine, LVL, MDF, extruded aluminum, or PVC. Substrates are extruded or edge-glued and profiled prior to wrapping.*

Veneer: *Any wood species, including oak, cherry, maple, fir, alder, and a wide variety of exotics. Veneers are fleece-backed; standard thickness is .024".*

Size: *Up to 10" wide and 16' lengths (18-footers on request)*

Finishing: *Wood veneers can be pre-finished with stain and/or top coat and an environmentally friendly UV cure.*

Some standard moulding profiles are sold through distribution. Call for details.
